DETAILED ACTION

- 1. Claims 1-2 and 12-13 have been examined and are pending.
- Claims 3-11, 14-22 and 23 have not been examined on the merits due to improper multiple dependent claim form.

Claim Objections

3. Claims 3-11 and 14-22 objected to under 37 CFR 1.75(c) as being in improper form because of multiple dependent claims 3 and 14 respectively. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 6. Claim 13 recites the limitation "system according to claim 1" in the first line of the claim. There is insufficient antecedent basis for this limitation in the claim. Claim 1 is a method, not a system. Examiner assumes that Applicant meant "system according to claim 12" and proceeds with examination of Claim 13 based upon that assumption.

Art Unit: 2152

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filled in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filled in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- Claims 1-2 and 12-13 are rejected under 35 U.S.C. 102(e) as being anticipated by US 2002/0157002 A1 (Messerges et al.).

As to Claims 1 and 12, Messerges et al. anticipate a method and system of generating an Authorized Domain (AD), the method and system comprising the steps of selecting a domain identifier (Domain_ID) uniquely identifying the Authorized Domain (100) (Messerges et al. – Pages 7-8, ¶ [0068] recites the selection of domain name and identification of user belonging to the domain by, inter alia, domain identifier; Page 6, ¶ [0055] recites domain identifier uniqueness),

binding at least one user (P1, P2, . . . , PN.sub.1) to the domain identifier (Domain_ID) (Messerges et al. – Pages 7-8, ¶ [0068] recites the selection of domain name and identification of user belonging to the domain by, inter alia, domain identifier), and

binding at least one device (D1, D2, ..., DM) to the domain identifier (Domain_ID) (Messerges et al. – Page 4, \P [0036] recites linking the devices to the domain's identifier), and thereby obtaining a number of devices (D1, D2, ..., DM) and

Art Unit: 2152

a number of persons (P1, P2, ..., PN.sub.1) that is authorized to access a content item of said Authorized Domain (100) (Messerges et al. – Page 3, ¶¶ [0030-0031] recite user authorization of content access).

As to Claims 2 and 13, Messerges et al. anticipate a method and system according to claim 1, characterized in that the method further comprises the step of: binding at least one content item (C1, C2, ..., CN.sub.2) to the Authorized Domain (AD) given by the domain identifier (Domain_ID) (Messerges et al. – Page 4, ¶ 100371 recites binding content to a domain's identifier).
